

Well Completion and Workover

Successful Well Completion & Workover Practices: A practical approach from design to field operations
Course Level : Intermediate

17th - 21st February 2025 at Kuala Lumpur, Malaysia | 10th - 14th March 2025 at Bangkok, Thailand
21st - 25th April 2025 at Bandung, Indonesia | 18th - 22nd August 2025 at Kuala Lumpur, Malaysia
25th - 29th August 2025 at Bandung, Indonesia | 08th - 12th December 2025 at Kuala Lumpur, Malaysia
15th - 19th December 2025 at Bali, Indonesia

Petrosync Distinguished Instructor

Mike Etuhoko, P.Eng., PMP, M.Sc., MBA, CCB.D

- ▶ Founder & CEO: Protekz Inc, Calgary, Canada
- ▶ Member, Business & Leadership Committee, The Society of Petroleum Engineers (SPE) Board of Directors

A lot of
Practical Things,
Case Studies
and Exercises!

- ▶ Over 30 years of engineering, operations, and management experience in Completion, Workover & Well Services, and Drilling
- ▶ Highly sought after Consultant, President & Founder of Protekz Inc Canada, an independent well and production engineering consultancy
- ▶ Leads major completion and workover projects with companies such as Shell Canada, KNOC, KPO etc in North America, Europe, Africa, Central Asia, & Far East Asia
- ▶ Authored and presented SPE Papers at the SPE Asia Pacific Oil & Gas Conference (Australia, 2004) & SPE Annual Technical Conference & Exhibition (Texas USA)

Who Should Attend?

- ▶ Completion Engineer /Supervisors /Superintendent
- ▶ Completions Team Led /Manager
- ▶ Well Services /Intervention Engineer /Supervisors
- ▶ Workover Engineer /Supervisors
- ▶ Petroleum Engineer
- ▶ Reservoir Engineer
- ▶ Drilling Engineer/Superintendent /Site Manager
- ▶ Oil and Gas industry Drilling/Completion/Intervention Service providers

Well Completion and Workover

17th - 21st February 2025 at Kuala Lumpur, Malaysia | 10th - 14th March 2025 at Bangkok, Thailand
 21st - 25th April 2025 at Bandung, Indonesia | 18th - 22nd August 2025 at Kuala Lumpur, Malaysia
 25th - 29th August 2025 at Bandung, Indonesia | 08th - 12th December 2025 at Kuala Lumpur, Malaysia
 15th - 19th December 2025 at Bali, Indonesia

Course Overview

This 5-day course will cover successful well completion and workover practices. It is a practical oriented course designed to bridge the knowledge gap in the area well completion and workover designs and operations.

Well completion is considered to be one of the most critical practices for reservoir exploitation and management. During this process, the responsible personnel is tasked to optimally design and install a system that can deliver its full potential to optimize oil gas and production, without compromising safety and reliability.

During the field life cycle, some reservoirs undergo some physical and chemical changes. This leads to loss of revenue as the wells are no longer operating at their optimal conditions. Hence, a workover/well intervention may be required to safely and efficiently restore the wells back to production. This presents a lot of challenges due to the different reservoir fluids, various operating conditions, and different operating environments.

The course possesses the following features:

- ◉ It is the first of its kind in the industry.
- ◉ It is loaded with practical examples, case studies, and industrial applications taken from:
 - Different operating environment (land, swamp, and offshore including deep-water)
 - Different well conditions: High-Pressure High-Temperature, sour gas, and sweet gas, etc.
 - Tropical and arctic (temperate) climates
- ◉ It provides practical exercises, and delegates will be followed up to ensure they can handle all the calculations, without difficulties.
- ◉ Focuses on different technological innovations to optimize reservoir drilling and completion practices, to improve well productivity.
- ◉ Sustainable and responsible oil and gas field development and production amid energy transition.
- ◉ It could be designed to meet the need of the clients on specific topics of interest.
- ◉ Team learning. A group completion design project accomplishes the course. All the elements of the course will help you and your team to handle the project challenge.
- ◉ Towards the end of the course, the groups formed in the class will present their completion design project for discussions/reviews.
- ◉ Delegates are allowed to come with their projects of interest, which they could substitute for the class field project design work but must be presented for discussions/reviews

Course Objectives

- ◉ Identify and understand the parameters that influence the selection and design of completion components.
- ◉ Integrate the importance of completion process to future production.
- ◉ Deliver techniques to select the best tubing size and best materials for well completion.
- ◉ Gain practical methods to design, plan and install safe and efficient well completion and workover.
- ◉ Manage well environments with extreme reservoir conditions (pressure, temperature, etc.)
- ◉ Bridge the importance of well design in relation to the ability to carry out well intervention.
- ◉ Explore new technological developments in well completions and workovers.
- ◉ Plan an appropriate intervention and workover strategy to maintain or increase the field production.
- ◉ Gain how to navigate sustainable and responsible oil and gas field development and production amid energy transition.

HYBRID TRAINING SOLUTIONS

FOCUS TRAINING • REDUCE COST • ENHANCED RESULTS

Over the years, there has been a growing demand for hybrid training programs. It is an excellent option to maximize your training dollar for your specific training needs. We make it possible to run a training program that is customized totally to your training needs at a fraction of an in-house budget!

If you like to know more about this excellent program, please contact us on +65 3159 0800 or email general@petrosync.com

Well Completion and Workover

17th - 21st February 2025 at Kuala Lumpur, Malaysia | 10th - 14th March 2025 at Bangkok, Thailand
 21st - 25th April 2025 at Bandung, Indonesia | 18th - 22nd August 2025 at Kuala Lumpur, Malaysia
 25th - 29th August 2025 at Bandung, Indonesia | 08th - 12th December 2025 at Kuala Lumpur, Malaysia
 15th - 19th December 2025 at Bali, Indonesia

Course Agenda

Day 1

- ▶ Introduction
- ▶ Introduction of individual, professional background, etc.
- ▶ Aim / Objective of the course
- ▶ Individual expectation from the course
- ▶ Safety Alert
- ▶ **Starter Quiz & Review**
- ▶ Introduction to Completion design
 - ▶ Definition of well completion
 - ▶ Oil and gas project life cycle
 - ▶ Types of well completion
 - ▶ Completion planning
 - ▶ Work flow for successful well completion & workover
 - ▶ Integrated approach to well completion
- ▶ Concept of Darcy's Law & SKIN
- ▶ Reservoir Completion:
 - ▶ Well Performance
 - ▶ Perforations
 - ▶ Well Stimulation
 - Stimulation of Sandstone reservoir
 - Stimulation of Carbonate reservoir
- ▶ **Introduction to completion design project**

Day 2

- ▶ Reservoir Completion: Hydraulic Fracturing
- ▶ **Class exercise:** The objectives of the class exercise on hydraulic fracturing are as follows:
 - ▶ Calculations on Fold of Increase (FOI) as a screening tool to select wells for hydraulic fracturing candidate.
 - ▶ Calculations to compare acid frac versus propped frac in a carbonate reservoir
- ▶ Sand control stimulation techniques:
 - ▶ Causes of sand production
 - ▶ Sand control design concepts
- ▶ **Class exercise:** The objectives of the class exercise on sand control are as follows:
 - ▶ Perforation gun selection
 - ▶ Perforation cleaning
 - ▶ Sand control design selection
 - ▶ Gravel size selection
 - ▶ Screen size selection
- ▶ Tubing Performance
- ▶ Artificial Lift Methods
- ▶ Production Chemistry
- ▶ Problem Identification

- ▶ **Class exercise:** The objectives of the class exercise on well problem identification are as follows:
 - ▶ Calculations on the effect of formation damage on well production
 - ▶ Calculations on flow efficiency
 - ▶ Use of production history to assess formation damage
 - ▶ Stimulation well candidate selection

▶ **Group work: Completion design project**

Day 3

- ▶ Tubing Stress Analysis
- ▶ Purpose of Stress Analysis
- ▶ Stress Loads: stress/strain, axial loads, burst/collapse and tri-axial analysis
- ▶ Safety Factors and Design Factors
- ▶ Load Cases
- ▶ Completion Equipment and Connections
- ▶ **Class exercise:** The objectives of the class exercise on tubing stress analysis are as follows:
 - ▶ Basic TSA calculations including weight in air, buoyancy force, axial force due to bending, safety factors, collapse loads, tensile yield, internal yield pressure, etc.
 - ▶ Tubing movements and tension calculations during well stimulation
- ▶ Materials Selection:
 - ▶ Metallurgy
 - ▶ Corrosion triangle
 - ▶ Types of corrosion:
 - Metallurgy
 - Corrosion triangle
 - Types of corrosion:
 - Sour corrosion (stress corrosion cracking, sulphide stress cracking, etc.)
 - Sweet corrosion,
 - Ggalvanic corrosion
 - Erosion-corrosion, etc.,
- ▶ Corrosion prevention methods
- ▶ Elastomers and Plastics
- ▶ Protective Coatings
- ▶ Material selections for all types of wells: Sour, sweet, HPHT wells, etc
- ▶ NACE/ISO on material selection
- ▶ Completion Components
 - ▶ OCTG selections
 - ▶ Completion components and selections: Christmas tree, tubing hangers, downhole safety valve, packers, expansion devices, nipples, downhole gauges, etc.
- ▶ **Group work: Completion design project**

Well Completion and Workover

17th - 21st February 2025 at Kuala Lumpur, Malaysia | 10th - 14th March 2025 at Bangkok, Thailand
 21st - 25th April 2025 at Bandung, Indonesia | 18th - 22nd August 2025 at Kuala Lumpur, Malaysia
 25th - 29th August 2025 at Bandung, Indonesia | 08th - 12th December 2025 at Kuala Lumpur, Malaysia
 15th - 19th December 2025 at Bali, Indonesia

Course Agenda - Continue

Day 4

- ▶ Completion operation base preparation
 - ▶ Equipment purchasing, manufacturing and factory acceptance
 - ▶ Service contracts
 - ▶ Equipment preparation
 - ▶ Technical program
- ▶ Rig preparation and completion installation process
 - ▶ Operation planning
 - ▶ Equipment shipping/transportation
 - ▶ Equipment reception
 - ▶ Pre-job meeting
 - ▶ Casing cleaning operation
 - ▶ Running in hole the completion equipment
 - ▶ Well clean-up
 - ▶ Reporting
 - ▶ After-action review
- ▶ Emerging Techniques
 - ▶ Fiber Optics: Distributed Temperature System (DTS), Pressure/ temperature (P/T), etc
 - ▶ Intervention-less packers (Hydrostatic packers, swelling packers, etc.)
 - ▶ In-situ self generating weak acid
 - ▶ Expandable tubulars
 - ▶ Expandable Sand Screens (ESS)
 - ▶ Sand Control in High angle and long interval: Alternate path technology (SHUTS, CAPS, etc.)
 - ▶ Formation Isolation Valves (FIV)
 - ▶ Intelligent & Smart Well
 - ▶ Completion: Interval Control Valves (ICV)
 - ▶ Underbalanced Drilling & Completion
 - ▶ Cased Hole Circulation Drilling & completion
 - ▶ Multistage Fracturing
- ▶ **Group Work: Well completion design**

Day 5

- ▶ Well Control:
 - ▶ Well control Equipment:
 - Blowout preventer system requirements
 - Choke Manifold
 - Circulating System
 - ▶ Kicks and its causes
 - ▶ Well Killing Operations:
 - Forward circulation
 - Reverse circulation
 - Bullheading
 - Lubricate and Bleed
- ▶ **Class exercises on well control**
- ▶ Workover Operations:
 - ▶ Workover definition and description
 - ▶ Workover Types:
 - Safety Workover (SWO)
 - Long term suspension (LTS)
 - Plug and Abandonment (P&A)
 - Production enhancement (PE)
 - ▶ Workover Feasibility Studies
- ▶ **Group presentation / General Review of the Well completion Design Project**
- ▶ **Wrap up**

PROGRAM SCHEDULE

09:00	Registration (Day1)
09:10 - 11:00	Session I
11:00 - 11:15	1 st Tea Break
11:15 - 13:30	Session II
13:30 - 14:30	Lunch Break
14:30 - 16:00	Session III
16:00 - 16:15	2 nd Tea Break
16:15 - 17:00	Session IV
17:00	End of Day

*Schedule may vary for each training

IN-HOUSE SOLUTIONS

SAVE COST • IMPROVE PERFORMANCE • REDUCE RISK

PetroSync understands that in current economic climate, getting an excellent return on your training investment is critical for all our clients. This excellent training can be conducted exclusively for your organization. The training can be tailored to meet your specific needs at your preferred location and time. We will meet you anywhere around the globe.

If you like to know more about this excellent program, please contact us on +65 3159 0800 or email general@petrosync.com

WHY YOU SHOULD ATTEND PETROSYNC'S EVENTS

- ◉ To ensure that all objectives of the course matches yours, all PetroSync programs are developed after intensive and extensive research within the industry
- ◉ PetroSync programs focus on your immediate working issues to ensure that you are able to apply and deliver immediate results in real work situations
- ◉ Application and implementation of industry knowledge and experience are the drivers for our course design, not theoretical academic lectures
- ◉ PetroSync training focuses on practical interactive learning tools and techniques including case studies, group discussions, scenarios, simulations, practical exercises and knowledge assessments during the course. Invest a small amount of your time to prepare before attending the course to ensure maximum learning
- ◉ PetroSync follows a rigorous selection process to ensure that all expert trainers have first-hand, up-to-date and practical knowledge and are leaders of their respective industrial discipline

INVESTMENT PACKAGES

Please checklist the package that you are attending!

	Well Completion and Workover SCHEDULES	LOCATION	PRICE
<input type="checkbox"/>	17 th - 21 st February 2025	Kuala Lumpur, Malaysia	USD 4,250
<input type="checkbox"/>	10 th - 14 th March 2025	Bangkok, Thailand	USD 4,250
<input type="checkbox"/>	21 st - 25 th April 2025	Bandung, Indonesia	USD 4,250
<input type="checkbox"/>	18 th - 22 nd August 2025	Kuala Lumpur, Malaysia	USD 4,250
<input type="checkbox"/>	25 th - 29 th August 2025	Bandung, Indonesia	USD 4,250
<input type="checkbox"/>	08 th - 12 th December 2025	Kuala Lumpur, Malaysia	USD 4,250
<input type="checkbox"/>	15 th - 19 th December 2025	Bali, Indonesia	USD 4,450

* All prices are subject to change without notice and are not guaranteed, except that prices for an order that have been accepted by PetroSync is not subject to change after acceptance

* Price is nett excluding Withholding Tax if any and will be quoted separately. Please send us the withholding tax payment receipt.

DELEGATE DETAILS

1st Delegate Name _____ Mr Mrs Ms Dr Others

Direct Line Number: _____ Email: _____

Mobile Number: _____ Job Title: _____

Department: _____ Head of Department: _____

2nd Delegate Name _____ Mr Mrs Ms Dr Others

Direct Line Number: _____ Email: _____

TERMS AND CONDITIONS

DISCLAIMER

Please note that trainers and topics were confirmed at the time of publishing; however, PetroSync may necessitate substitutions, alterations or cancellations of the trainers or topics or location (classroom / Virtual). As such, PetroSync reserves the right to change or cancel any part of its published programme due to unforeseen circumstances. Any substitutions or alterations will be updated on our web page as soon as possible.

DATA PROTECTION

The information you provide will be safeguarded by PetroSync that may be used to keep you informed of relevant products and services. As an international group we may transfer your data on a global basis for the purpose indicated above. If you do not want us to share your information with other reputable companies, please tick this box

CANCELLATION POLICY

Delegates who cancel after the training is officially confirmed run by email, are liable to pay the full course fee and no refunds will be granted. You may substitute delegates at any time as long as reasonable advance notice is given to PetroSync.

In the event that PetroSync cancels or postpones or change the trainer or change the training location (classroom / virtual) of an event for any reason and that the delegate is unable or unwilling to attend in on the rescheduled date, you will receive a credit voucher for 100% of the contract fee paid. You may use this credit voucher for another PetroSync to be mutually agreed with PetroSync, which must occur within a year from the date of postponement.

PetroSync is not responsible for any loss or damage as a result of the cancellation policy. PetroSync will assume no liability whatsoever in the event this event is cancelled, rescheduled or postponed due to any Act of God, fire, act of government or state, war, civil commotion, insurrection, embargo, industrial action, or any other reason beyond management control.

CERTIFICATE OF ATTENDANCE

80% attendance is required for PetroSync's Certificate of Attendance.
